Instantly Adjustable Compression - "Compression for the 21st Century"

Juxta CURES - an alternative to bandaging - is an instantly adjustable system for the treatment of venous stasis ulcers. It is easy to use and comfortable to wear, and is designed to be effective for 6 months of daily use.

Juxta CURES has a built-in pressure system guide that helps ensure that correct and consistent pressure (20, 30, 40 or 50 mmHg) is applied to the lower leg.

The built-in pressure system guide card can also promote self management by helping the patient to check the pressure level during the day. The Juxta CURES can be re-adjusted as required to maintain the pressure - you can't do that with bandages!

Features:

- Measurable graduated compression
- Custom built for a perfect fit on a vast majority of leg shapes
- Lightweight, breathable and slim-line
- Three lengths
- Machine washable
- 6 month guarantee

Juxta CURES

Benefits:

- Improved healing rates
- Can help to promote self management
